

Department of Physics Colloquium

March 11, 2024

3:00 PM

Graduate Student Progress Reports

Victoria Palmaccio

Hyperfine splitting measurements with magneto optically trapped cesium isotopes

Raj Sah

Meta-GGAs vs hybrid functionals for point defects: The best of both worlds

Brendan Rowe

Spectroscopic study of highly excited electronic states of the cesium dimer

Alexander Courchene Trackman

Interfacial ferromagnetism and metal-insulator transitions in $\text{LaNiO}_3/\text{CaMnO}_3$ superlattices

This colloquium will be held in-person, in SERC 116
